The attempt of the Colorado Demo erats to "count in" their candidates for them. We can have good times always governor and congressman, by holding back the returns from a couple of counties, will hardly win, since the legislature which must canvass the votes is strongly enough Republican to guard against fraud. The plan, however, is characteristically Democratic, and has been tried often. The last notable instance was in Ohio last fall, when a Democrat from one of the back districts telegraphed to the chairman of the state central committee, asking "will a thous and majority from our county do any mustache, a clerk in the Recorder's brance of a grateful country.

The chairman (who, by the way, is now an officer of the Confederate House) promptly replied, 'it will do us a great deal of good," but the telegram somehow got into the news papers, and it is a suggestive fact that when the official vote came in the democratic majority in the county that was to be manipulated had become transposed into one of several hundred on the other side. And that is a simple of Democratic "reform."

A CHEERFUL PICTURE.

One of the best things we have seen with reference to the hard times and their cure is the following, from the New York correspondence of the Quiney Whig.

Business is blooming and everybody trade, and the complaint new is that customers cannot be attended to. Hundreds of southern and western people are here, many of them sight-seeing, but more making glad the hearts of the merchants by purchasing. The streets are crowded with trucks, as in the good old days, and the piles of boxes on the side walk are appailing to all but those who are rolling them. The hotels, for the first time in three years, are crowded, the daily arrivals occupying five and six columns in the papers, run in solid in very small type, and this only of the leading houses. All this indicates the revival of confidence that we have been hoping for, and now let the growling stop in the country Let us all put our shoulders to the wheel and go to work to do something. The hard times are over when the people say so, and act as though they believe it. If you have a house to build and can afford it, go on and build it. The sun is going to rise just as many times this year as ever, There is money enough and to spare, and all that is needed, is to get rid of the senseless scare, and with confidence go on. This is all that is necessary to make good times. There are reasons why we should not let business go by the board, if it can be avoided. We steady stream of emigration flowing into the country, the most with money and all with labor, all of which ceased the moment the cry of "hard times" was raised. This stream we ought to doing something. There are millions of Germans, French, Irish and Scotch

Columbus, Ohio, Oct. 4.—There has been an immense amount of lying about the charge that Gov. Hayes has written or authorized to be written a letter endorsing certain principles of American Alliance. The following is an exact copy of the resolutions of that or ganization which it is claimed were responded to by his private secretary.

> Cause of Demise.—An exchange records the demise of the Centennial, a small paper published for a while at Illiopolis, and gives as a reason for the early death of the concern, "Too much whisky and not enough money." Our idea is that this combination would break down any concern or individual in the country-and one feature of the case should not be overlooked, and that is, that too much of the first-named commodity is sure to produce a deficiency of the latter.

MANUFACTURE AND SELL

MERRILL & BARTLETT'S Water-Puritying

Rubber Bucket Chain Pump, And is prepared to furnish said Chain Pumps on short notice.

Pumps on short notice.

The advantages of this Pump over many others are many. The Chain being buttonless, it is much lighter, consequently it is not liable to break, and works much easier. The RUBBER BUCKETS which are attached to the Chain will not wear the Tubing, consequently it will last longer than when Metal Buttons are used. It is positively, ANTI-FREEZING, It is a positive WATER PURIFIER, as each Bucket is constructed with an AIR CHAMERS, which carries a given quantity of pure air into the water, which immediately diffuses through the entire body of water, purifying and cleaning, and rendering it it ior use.
